Happy Mother's Day!
JONI LAMB

I have been watching Daystar every day for many, many years. I was one of Marcus' praying grandmas! I love being a partner with Daystar because I know my donations benefit God's people. I also give to Israel and pray for the peace of Jerusalem. Thank you and God bless you all!

Betty from California

UNVEILING THE A.I. APOCALYPSE

with Perry Stone

What inspired you to write "Artificial Intelligence Verses God: The Final battle for Humanity?"

PS: I began reading of the sudden advancement of AI and the many dangers it could present, including eventually replacing up to 60% of jobs. I knew this was a place the entire world was heading towards and I wanted to have an in-depth word for the people of God on the subject. The book is well researched, with documentation and quotes, along with major biblical insights. It actually reveals five ways God will eventually destroy the technology of mankind during the Great Tribulation.

Many Christians are curious about how technology, especially AI fits into biblical End-Time scenarios. Can you elaborate on this?

PS: It can be compared to the clash between the Tree of Life and the Tree of the Knowledge of Good and Evil. It is about man's creative ability to enhance knowledge on a level never before seen. It is all about fast speed advanced knowledge, and Satan's original comment to Eve, "You shall be as God." It also is linked with the ancient Tower of Babel syndrome, where the people thought, "There is nothing restraining us that we cannot do..." (Gen. 11), except now the "towers" are computer main frames.

Do you believe AI is trying to challenge or even replace the role of God in human affairs?

PS: It may not have been originally planned for this purpose, but it has advanced to this level. A suggested AI religion will include a humanoid-like robot that will answer the most complicated religious questions, and some have suggested it will become a new god forming a new religion. This is just one suggested aspect of replacing the old religion for a new one.

How can Christians maintain their faith and biblical perspective in a world increasingly driven by technological advancements, including AI?

PS: Daniel 12:4 teaches that in the time of the end, "Many will run to and fro and knowledge shall be increased." We must acknowledge that we are living in the time of the end – and all of these discoveries, inventions, and progressions in advanced knowledge will emerge as part of the plan of prophecy. Eventually, nations will go cashless and purchasing will be with a mark, name, or a number (Rev. 13:16-18). We must learn to navigate and accept what is good, but strongly reject those things that are morally or spiritually dangerous. The internet is an example. It can be used for good or evil, for spreading the Gospel or for criminal activity. Money is amoral – neither good or bad – as it depends upon how it is used, for illegal drugs or for groceries. The same is true with advanced knowledge and AI.

In your opinion, does AI pose a significant threat to human spirituality or the essence of what it means to be human? If so, how?

PS: There are AI specialists who advance a theory that eventually, AI knowledge will advance to the level of giving a human the possibility of eternal life. They theorize that new cell transplants, new types of organs, and other advancements will bring mankind to a utopian society and cause us to live for hundreds of years. Of

course this sounds great, but God said, "It is appointed unto men once to die" (Heb. 9:27), and only a redemptive covenant through Christ can bring eternal life and a future glorified body. This is the type of clash between traditional Christianity and the new system that will emerge with the False Prophet of Revelation 13.

Are there any biblical passages or prophecies that you believe directly relate to the emergence of Artificial Intelligence and its impact on humanity?

PS: The clearest reference is in Revelation 13, where men will create the "image of the beast," causing it to "speak and live." This speaking, talking image will be worshiped and those refusing will experience death by beheading (Rev. 13:11-18). The Greek word here for image is the word for icon, which is a religious image venerated in some religions. I have a chapter in the book in which I tackle the question of whether this image "created by men" is a possible advanced human-type robot that has full intellect and operational abilities as a human would. There are several possible interpretations to what this is and how it will work, including the object being a satanic-inspired false miracle that deceived the world (Rev. 13:14).

As Christians, how can we engage with AI and technological innovations in a way that aligns with our faith and values?

PS: When television first came out, some Christians refused to have it as they considered it evil. The internet was once considered a system of the Antichrist and some rejected all use of it. As with any technology, I always ask myself, "How can I use these systems to advance the printed, visual, or recorded Word of God to reach the masses?" Some AI technology can be an assistance to writing books, articles, editing, and doing work faster than

we have ever known. I would say this is the view we should take. Use the good and reject the side that is dangerous or could cause harm. The fact is, the Bible is still the anointed Word of God and will change lives in whatever method it is used to reach the world.

What message or encouragement would you offer to Christians who may feel overwhelmed or uncertain about the implications of AI on their faith and the future of humanity?

PS: I would suggest to remember that we now have the greatest opportunity to reach more people, in their language, with the Gospel than ever before. For several years, I have conducted large evangelistic meetings in a foreign nation with as many as 70,000 people, as I preach from my studio in Cleveland, Tennessee, and they show me live on a big screen halfway around the world. We have seen over 120,000 souls won in four years! This is because of technology. The Gospel must be preached in all nations and then the end comes! We are in the time of the end and our focus must be on souls, souls, souls! God will use this technology to advance the Kingdom and Satan will use parts for his advantage. Just be mindful and discerning. In the end, God will defeat AI, including five different methods, that I discuss in my new book. God will always win in the end!

In the end, God will defeat AI... God will always win in the end!

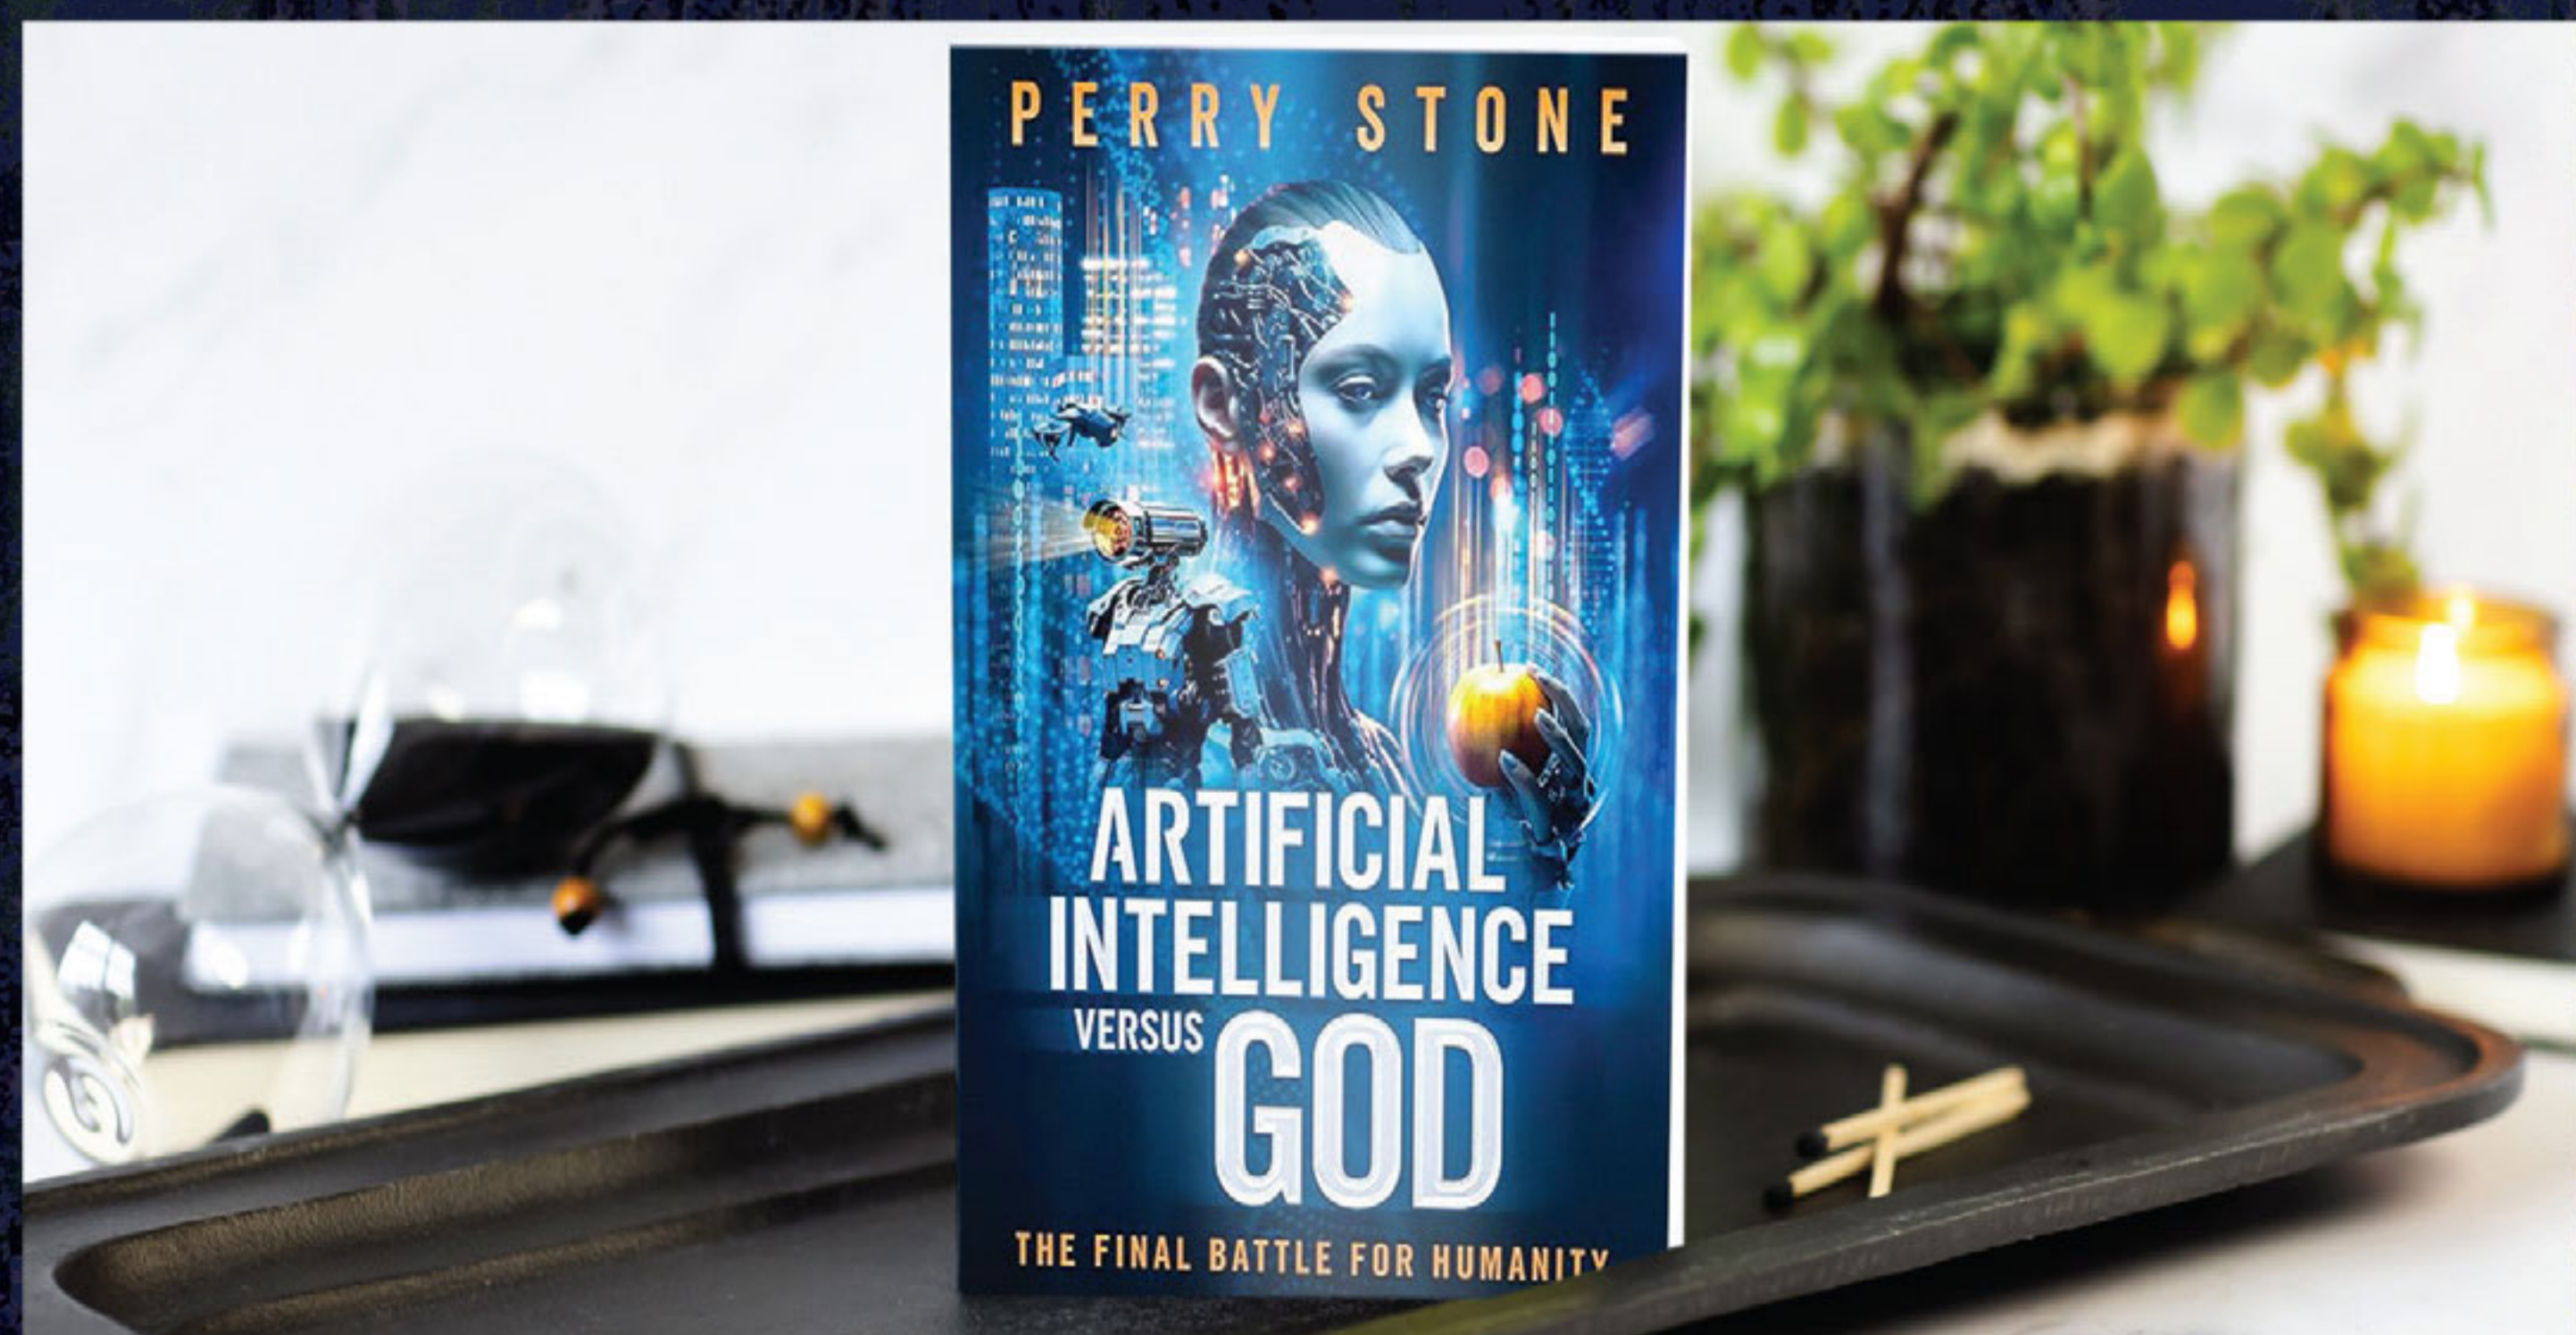

ARTIFICIAL INTELLIGENCE VERSUS GOD

What is Artificial Intelligence? And why should I care? If those questions sound familiar, this exciting new resource from Perry Stone is for you!

In a rapidly advancing technological era, Perry Stone invites readers on an enlightening exploration through the pages of "Artificial Intelligence Versus God," a groundbreaking book that delves into the intersection of faith and technology. With profound insights and biblical wisdom, Stone navigates the complexities of artificial intelligence, offering a compelling perspective on its implications for humanity and our relationship with God.

"Artificial Intelligence Versus God" confronts the pressing questions surrounding AI and its potential impact on faith, morality, and the essence of what it means to be human. With a keen eye toward the biblical narrative, Stone **examines the rise of AI through the lens of Scripture**, illuminating timeless truths that speak to the heart of our technological age.

Why should you get your hands on "Artificial Intelligence Versus God"? This book is a **timely resource for Christians seeking to understand the implications of AI from a biblical perspective**. As society grapples with questions of ethics, identity, and the nature of consciousness, Stone provides valuable insights that challenge conventional thinking and inspire deeper reflection.

For a limited time, you can secure your copy of "Artificial Intelligence Versus God" by making a special donation to Daystar this month using the enclosed form. Your generous contribution not only grants you access to this thought-provoking resource but also supports our ongoing efforts to spread the Gospel and uphold the light of God's truth in an ever-changing world.

Don't miss this exclusive opportunity to uncover truth with "Artificial Intelligence Versus God" and contribute to our mission of sharing the transformative message of Christ. Together, let's navigate the complexities of our technological age with wisdom and discernment, grounded in the unchanging truths of God's Word.

MOTHER'S OF THE BIBLE

- WORD SEARCH -

In honor of Mother's Day this month, we've created this fun word search for you! The names of 12 moms from the Bible are hidden in the puzzle below... how many can you find?

Hello, Daystar family!

This time of year, I find myself in awe of the beauty of new beginnings. It's like the world around us is echoing the message of resurrection and renewal that we celebrated just a few weeks ago. And as May begins, we're looking forward to Mother's Day just around the corner! Whether you are a mom, have a mom, or are simply surrounded by amazing women who nurture and care, you deserve all the love and appreciation in the world.

Speaking of moms, I can't help but celebrate my own incredible mom and my daughters who are walking the beautiful journey of motherhood. Their love, strength, and wisdom inspire me every single day.

Now, onto some more celebrations! Can you believe it's been a whole year since little Noah Wells came into our lives? We are so excited to celebrate his first birthday this month as we thank God for the gift that he is to all of our lives. But the celebrations don't stop there... Let's also send warm wishes to my sweet grandson Boaz and my amazing son-in-law Josh on their birthdays this month!

In network news, I am thrilled to share some incredible updates with you all. Our Daystar family is growing, and we're reaching even more hearts with the Gospel. Daystar has launched in Cameroon, Africa on "My Prime Media" to 7 million homes! Only a small dish or antenna is required to watch Free to Air! And in the United Kingdom, we have launched on "Freeview" to 18 million homes. Freeview is built into Smart TVs and is Free to Air.

None of this would be possible without your unwavering support and prayers. Your partnership truly makes a difference, allowing us to spread the love of Jesus to the ends of the earth. Thank you for standing with us on this incredible journey of faith and transformation. As we step into this new month, let's continue to believe for miracles, breakthroughs, and divine encounters. May the Lord's blessings overflow in your lives abundantly, and may His grace be your guiding light in every step you take.

Yours for Christian Television,

Joni Lamb
Co-Founder & President
Daystar Television Network
